

Easy TEM

MONITOR YOUR COMPANY
MOBILE DATA USAGE
PREVENT DATA OVERAGE AND
UNEXPECTED COSTS.

EasyTEM is a corporate management platform designed to monitor mobile data usage. It consists of a web-based system and an application installed on each employee's mobile device. EasyTEM provides managers and those responsible for corporate data consumption a detailed view of the data usage scenario in real time. EasyTEM analyses data consumption on several levels, monitoring the company, branch, department, cost center, and individual users, among others.

Why EasyTEM?

- ✓ The first worldwide professional tool equipped with a simple interface and no required end-user interactions.
- ✓ Provides employees with an efficient, simple tool to stay in accordance with the company's compliance.
- ✓ Comprehensive analysis of data consumption by technology, Wi-Fi, 3/4/5G and roaming. Flexible configuration tailored to address any contract through any carrier.
- ✓ Allows for operationalization outsourcing of the platform by our telecommunication specialists. Focus on your business and let us bring you maximum results in the form of stellar management and savings every month.
