

SMART DENT

<https://smartdent.tech/>

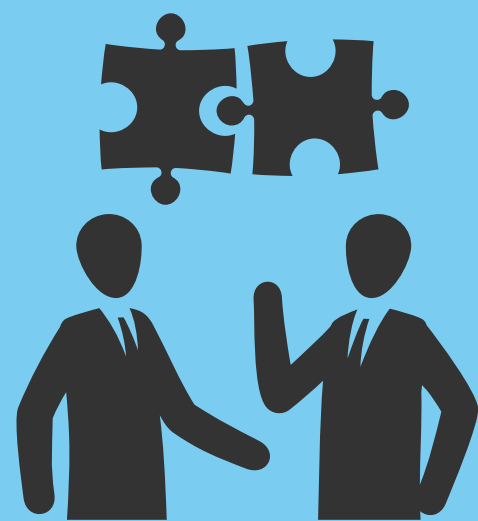

We improve the dental clinic revenues by automating the documentation related to patient diagnostic using advanced AI systems

PROBLEM

Dentists and health professionals spend significant time to document and write reports for patient diagnosis.

Dental clinic staff spend lot of time for insurance claim and it is a error prone procedure.

SMART DENT SOLUTION

We have developed a artificial intelligence tool that can write the reports comparable with the reports written by the dentists and also handle the time consuming insurance claim documentations.

PARTNERSHIP

Our company will work closely with the dentists and dental clinic owners to integrate our solution in the dental clinic work flow. Our goal is to improve the revenue by at least 20% for medium size clinics.

COST

We believe that our product will pay for itself by freeing up the dentists time and also will remove the errors from the insurance claims that cause to claim rejection.

We offer our solution on subscription basis and we can provide customized plans if needed.
