

# A SaaS-based, privacy-oriented time tracking platform that increases productivity for remote teams

Organizations that rely on traditional timesheets can spend up to 16 DAYS annually searching for paperwork!

## Who we are

We are a **SaaS-based company** that brings together remote teams and helps them centralize all time records  
We have delivered **200+ apps** for clients across **15+ countries** since the last **10+ years**

## The problem

### North American businesses struggle to

- » Manage outsourcing contractors in LatAm, Eastern Europe & Asia
- » Track project progress
- » Achieve transparency in billing
- » Get value for money

### Business owners of S/W development companies struggle to

- » Manage remote team members
- » Calculate overtime
- » Generate timesheets for clients
- » Analyze work patterns
- » Process payroll
- » Generate invoices
- » Get paid on time

## Our solution

A SaaS-based time tracking platform powered by AI that eliminates the need for inefficient & outdated time management systems

## How it works

### Productivity platform that truly understands remote teams

- ✓ Shareable time reports
- ✓ Project budgets
- ✓ Team scheduling
- ✓ Automated payroll management
- ✓ time-off requests
- ✓ Idle time detection
- ✓ Data analysis
- ✓ Productivity measurement

## Our Team
