

# Retail Inventory Management Solutions

*improving retailers cashflow.*

## ABOUT US

Valinno is an easy-to-use cloud-based inventory management software that helps retailers; improve cashflow and increase profit.

## THE PROBLEM

Many retail businesses are closing due to poor cashflow management, lack of inventory buffers, and inability to react quickly; to changing consumers' demand.

## THE SOLUTION

By applying machine learning (ML) to consumption trends, Valinno is able to recommend which products, when to purchase and what quantity to buy. This improves cashflow by making sure retailers only spend money on what their customers would buy.

## COMPETITORS

MarketMan, Growzer and Orca

## BUSINESS MODEL

- Monthly and Annual Subscription Plans

## OUR TARGETS

Our targets are Mini-Marts, Grocery Stores, Supermarket, Boutiques, Pharmacies and all Retail Outlets.
